Leet Code

- ## **Problem Solving**

1. **Do 4 easy, 8 medium , 3 hard questions on each topic**

2. **Solving :**

i]   See constraints for questions
ii]   Write Code in book before typing, see complexity
iii]   Type code in editor
iv]   Use example test cases in console
v]   Use hint in lower right corner
vi]   If answer not found after **20 - 25 min** see discussion
        & solution
vii]   After solving see others more **efficient solution**
viii]   Take notes on right side of editor, notes icon, of the
things learned in the problem.

3. Other:
-- Fullscreen view is available
-- List option available for listing questions

1.See Roadmap
https://leetcode.com/explore/learn/card/the-leetcode-beginners-guide/679/sql-syntax/4358/

2. Do Explore Cards
https://leetcode.com/explore/learn/

3. Solve problem of day
 (only after all DSA completion)
